

Define CS, fit	1. CUSTOMER SEGMENT(S)	6. CUSTOMER CONSTRAINTS	5. AVAILABLE SOLUTIONS	Explore AS,
	<ul style="list-style-type: none"> <li>Patients</li> <li>Hospital Management</li> </ul>	Customers require more accurate and early predictions of Length of Stay (LOS).	There are few Length of Stay prediction model available which lacks in predicting some exceptional case where the length of stay may extend.	

Focus on J&P, tap	2. JOBS-TO-BE-DONE / PROBLEMS	9. PROBLEM ROOT CAUSE	7. BEHAVIOUR	Focus on J&P, tap
	Length of stay prediction may vary based on the patient's stage/severity of disease. Patient may get dissatisfied if there is no bed availability.	Unpredictable length of stay and improper medical records are the root cause of the problem.	Developing a model which predicts the length of stay of unexceptional cases with better accuracy.	

Identify strong TR & EM	3. TRIGGERS	10. YOUR SOLUTION	8. CHANNELS of BEHAVIOUR	Identify strong TR & EM
	<p>To accurately predict the length of stay.</p>			
	4. EMOTIONS: BEFORE / AFTER			
	<p>Before : Patients often get frustrated and depressed.</p> <p>After: They feel better and get new beginning.</p>	<p>Our solution includes using algorithms like Fuzzy Logic, Tree Bagger, Random Forest, and Decision Trees to predict the length of stay more accurately. Gives frequent update about the bed availability.</p>	<p>Users will check for bed availability.</p>
